8000 GUESTS AT WEDDING FEAST LASTING 8 DAYS

[Associated Press]

VIENNA, July 21.—A wedding whose guests numbered over 8000 persons and whose feasting continued for eight days was celebrated recently at Sadagora in Bukowina, one of those remote country districts of Austria-Hungary where mammoth wedding festivities on a scale utterly unknown in America or Western Europe are the rule.

The affair at Sadagora exceeded in magnificence and lavish hospitality any function on record in that district, however. It was a Hebrew wedding. Sadagora enjoys a certain fame in eastern Europe as the seat of the renowned Rabbinical dynasty known as the Miracle Rabbis. The bride was the daughter of the Grand Rabbi of this line, Aron Friedmann, and the groom, Salomon Friedmann, belongs to a branch of the same rabbinical dynasty at Czortkow. The marriage was arranged by the chiefs of the two families, entirely without the knowledge of the young people. In fact, they met for the first time only the evening before the wedding at a preliminary feast, when they danced together as a sign of their willingness to marry.

The chiefs had taken it for granted that there would be no hitch in their plans, and had invited the rabbinical families of all the orthodox Jews in Russia, Poland, Rumania, Galicia and Hungary. They came down on Sadagora in thousands. Many were of imposing stature and patriarchal dignity. They wore black silk caftans, low shoes and white stockings, while the ladies were attired in a sort of crinoline and adorned with rich jewels. There were some dressed in the latest modes of Paris and Vienna.

The ceremony took place in the grand rabbi's palace, guarded by mounted troops. Thousands were unable to hear or see what was going on, so dense was the throng, but all had a hand in the feasting which followed. During the eight days the commissary's books accounted for 200 pounds of fish, 500 head of poultry, 250 pounds of beef, 5000 pounds of bread and many casks of wine. The grand rabbi was out of pocket to the extent of at least \$40,000.

In addition to this he presented the bride couple with a palace in Sadagora, completely furnished and equipped with a staff of servants. He will meet the entire cost of the household for a period of six years, when it is assumed that the young bridegroom will have attained a position where he can support his family himself.

First Lady—"Too bad! Mrs. S. always has such abominable weather for her afternoon teas."

Second Lady—"Yes; she never pours but it rains."—Tilt Bits.

THE USE OF BOTH EYES

Most people are unaware that the apparent distance of an object depends upon the use of both eyes. This fact, however, can be strikingly shown. Place a pencil so that two or three inches project over the edge of a table. Then stand alongside the table, close one eye, and attempt to knock the pencil off by quickly hitting the projecting end with the tip of the forefinger. Almost invariably the person making the attempt underestimates the distance by an inch or more, and much to his surprise, misses the pencil entirely. One-eyed people, accustomed to estimating distances only with one eye, of course have no trouble in hitting the pencil at the first trial.

To make a person think there are two marbles where only one really exists, have him cross the second finger over the first, close his eyes, and tell you how many marbles he is touching when you hold a single one in contact with the ends of the two

crossed fingers. The illusion is very startling and the person almost invariably has to be shown the single marble before he believes there is only one. If a marble is not convenient, the end of a pencil or other small object may be used. To test your ability to make your muscles work as you desire, try sliding the forefinger of the left hand backward and forward along the edge of a table; at the same time, tap in the same spot with a pencil in the right hand so that the end touched the table midway between the ends of the path the forefinger follows. At first it is extremely difficult to make the pencil tap in the same spot without hitting the finger, but after a little practice you will find that quite the contrary is the case, for it soon becomes almost impossible to make the object with which the tapping is done touch the forefinger or vary from the same spot on the table.—Fred Telford in St. Nicholas.
